

Sustainable & Circular ECONOMY

ON-LINE
CONFERENCE

A holistic approach is one of the biggest weaknesses of public policy. The area of quality of life and housing is no exception. The state primarily focuses on only one aspect and directs its support primarily to reducing energy consumption. However, it overlooks the possible benefits and synergies of broader support for quality and healthy living. It is not just an abstract issue.

HEALTHY LIVING ENVIRONMENT

15. April 2021 / 09.00 on-line streaming

[Registration](#)
